

Oilseeds: World Markets and Trade

U.S. Soybean Futures Top \$10/bu on Strong China Demand and Limited Brazil Supplies

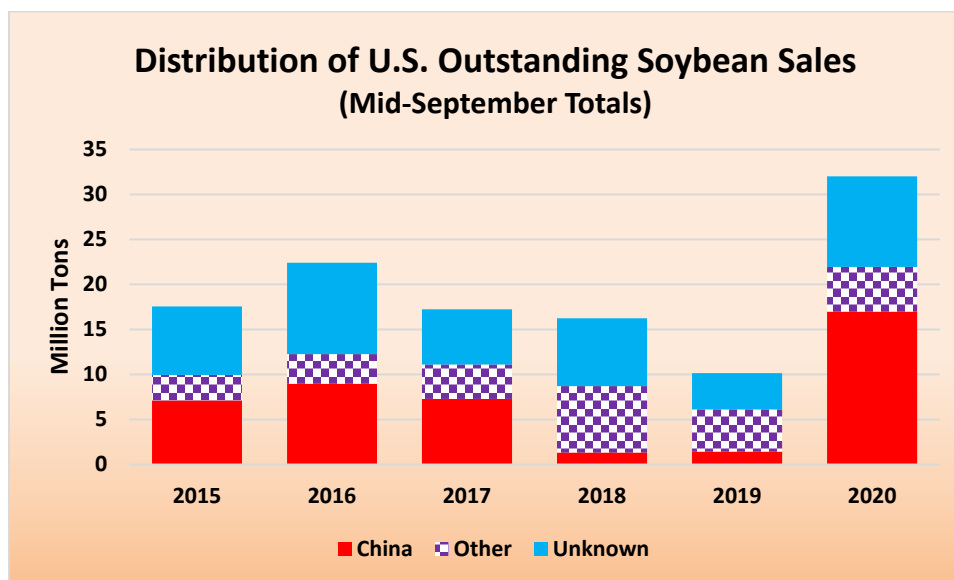

Soybean prices on the Chicago Exchange topped \$10.00/bu in mid-September, eventually peaking at \$10.44/bu on September 18 before falling back to just below the \$10.00 dollar mark at the end of the month. Subsequently, prices rallied again to near \$10.50/bu following the release of the September *Grain Stocks* report and further export sales strength. This is the first time near-term soybean futures have reached the \$10.00 mark since early June 2018. Current prices are roughly 27 percent above levels observed in early August prior to the first NASS 2020 soybean yield estimate.

The dynamics behind the mid-August to mid-September price surge are complex but basically reflect a rebound in China purchases of U.S. soybeans and limited availability of exportable supplies in South America. Recovery of China's pork industry from African Swine Fever has spurred imports in 2020 with volume up 8.4 million tons (15 percent) for the first 8 months of 2020 compared to a year earlier. Most of these purchases were from Brazil, where exports to all markets (January-September) were up 30 percent year-over-year to a record 79.2 million tons. The strong pace of 2020 exports, driven by strong China demand and a

record low exchange rate, has depleted exportable supplies and is forecast to drive Brazil imports to their highest level since 2003.

Consequently, China buyers have turned aggressively to securing U.S. soybeans in recent months. Outstanding sales to China in mid-September totaled nearly 17.0 million tons, nearly equal to the record set in 2013. Total outstanding sales for all markets in mid-September, including unknown destinations, is at a record 32.0 million tons, a three-fold increase compared to 2019.

Weather issues in the United States and related reductions in forecast soybean production have further reduced forecast ending stocks when combined with lower 2019/20 carryout. This increases the possibility of global supplies tightening in 2021, particularly if the current La Niña weather pattern leads to drier conditions in South America. This has likely added some strength to futures prices. However, soybean stocks in China are currently high, rivaling the stock levels seen at this time in 2018, and could mitigate any price strength resulting from production shortfalls.

Futures markets do show some softening of soybean prices timed with the 2021 South American harvest yet currently remain above \$10.00/bu through the August 2021 contract. The strong rebound in China purchases and further draw down in U.S. stocks should keep near-term prices well above the low levels observed in 2019 and earlier this year.

PROJECTION FOR 2020/21

Global 2020/21 oilseed production is forecast at 605.5 million tons, down 3.7 million from September. Reduced sunflowerseed production, principally in Ukraine, but also in the EU, Argentina, and Moldova, and lower soybean production in the United States account for all the decline this month as small changes in the remaining oilseeds are mostly offsetting. Lower EU sunflowerseed production is a result of dry growing conditions reflected in early harvest data. Declines in Argentina reflect planting intentions for the coming crop. Soybean production in the United States is lowered 1.2 million to 116.2 million tons in response to reduced acreage harvested. Oilseed trade is higher on increased China imports and exports from the United States. Global ending stocks are down 5.8 million tons driven by reduced soybean carryin and production in the United States, higher U.S. soybean exports and lower global sunflowerseed stocks reflecting production declines.

Protein meal and oil trade is marginally lower, reflecting the smaller crush and lower exports by Ukraine in response to reduced sunflowerseed availability. However, total oilseed meal production and consumption are up on growing demand for soybean meal in China and higher rape meal consumption in China and the European Union. Global oil consumption is raised this month on rising demand in China, principally for soybean oil. The projected U.S. season-average farm price for soybeans is raised 55 cents to \$9.80 per bushel in response to recent price strength as strong demand by China and concerns over dry weather in South America lead to a tighter global supply situation. This price is \$1.45/bu above the August forecast of \$8.35/bu.

PROJECTION FOR 2019/20

Global oilseed production is slightly lower at 577 million tons. Oilseed imports are down 1 million tons to 187 million primarily on trade trends as final year figures become available. Exports are also 1 million tons lower on reduced Argentina soybean trade. Crush is up 2 million tons, mostly on larger final estimates for soybean crush in China and sunflowerseed and rapeseed crush in the European Union. Consequently, ending stocks are down 3 million tons with additional disappearance in the United States. Global meal trade is forecast down 1 million on lower Argentina and India soybean meal exports. Oil trade is up 1 million tons on stronger sunflowerseed and palm oil trade.

EXPORT PRICES

	September 2020 Soybean Export Prices		
	U.S. Gulf FOB	Argentina Up River FOB	Brazil Paranagua FOB
September Avg Price	\$ 414/ton	\$ 410/ton	\$ 434/ton
Change vs August	+ \$ 42/ton	+ \$ 40/ton	+ \$ 37/ton

Source: International Grains Council

Soybean export prices for the world's three largest exporters continued to strengthen in September reaching 4-year highs. Prices have been surging on stronger export demand, depleted South America supply, reduced U.S. production numbers, and lower carryin from 2019/20.

September 2020 Soybean Meal Export Prices			
	U.S. Gulf FOB	Argentina Up River FOB	Brazil Paranagua FOB
September Avg Price	\$ 385/ton	\$ 377/ton	\$ 381/ton
Change vs August	+ \$ 39/ton	+ \$ 40/ton	+ \$ 39/ton

Source: International Grains Council

Meal prices built on August momentum to further strengthen throughout September. Price growth can be attributed to higher soybean prices and the rebuilding of swine herds lost due to African Swine Fever.

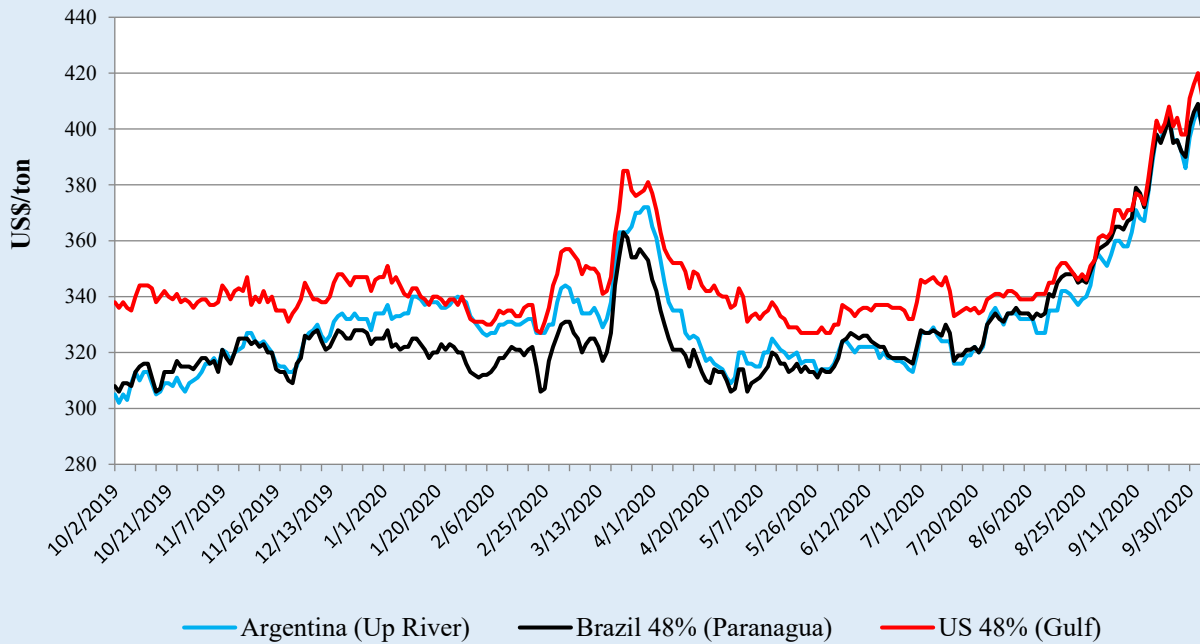

September 2020 Soybean and Palm Oil Export Prices					
	U.S. Gulf FOB	Argentina Up River FOB	Brazil Paranagua FOB	Indonesia Palm Oil	Malaysia Palm Oil
September Avg Price	\$ 813/ton	\$ 799/ton	\$ 855/ton	\$ 723/ton	\$ 746/ton
Change vs August	+ \$ 42/ton	+ \$ 53/ton	+ \$ 82/ton	+ \$ 31/ton	+ \$ 36/ton

Source: International Grains Council

Rising oil prices persisted in September due to stronger demand for oils and reduced crushing in South America. Brazil soy oil prices climbed to a 6-year high in September, owing to tight supplies and strong biodiesel demand. Palm oil prices continued to rally, tracking strong soy oil prices and higher demand in Asia..

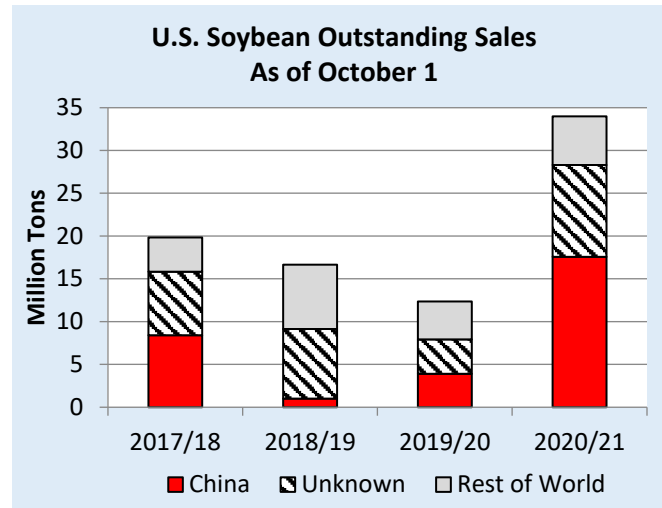

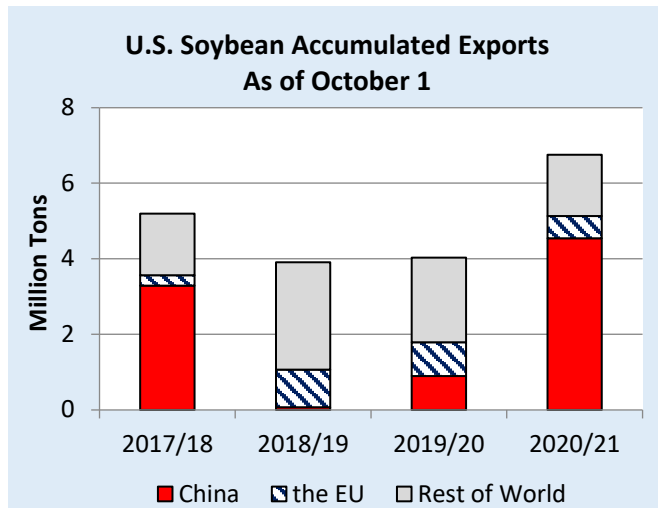

SOYBEAN MEAL EXPORT PRICES

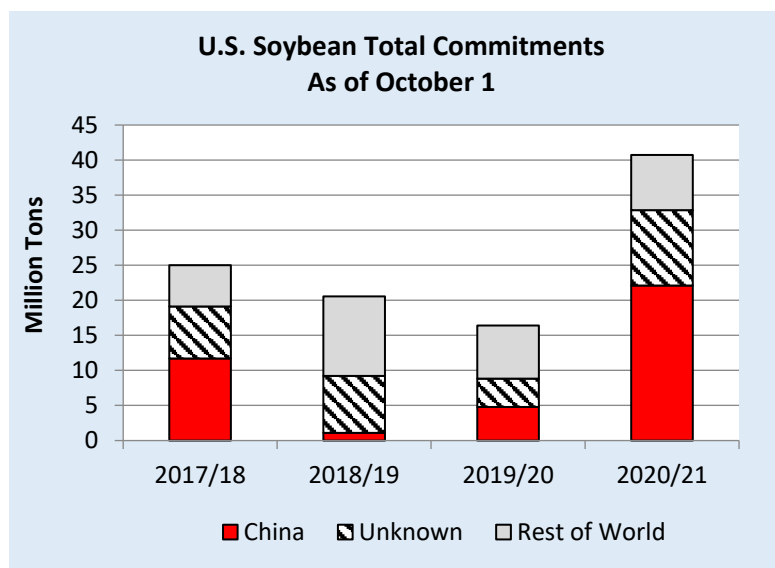

SOYBEAN AND PALM OIL EXPORT PRICES

EXPORT SALES

As of the week ending October 1, 2020, U.S. soybean accumulated exports (shipments) to China totaled 4.5 million tons and 1.6 million to the rest of the world. Outstanding sales reached 17.6 million tons to China (a record) and 16.4 million to the rest of the world. During the same period last year, accumulated exports to China were 896,000 tons and 3.1 million tons to the rest of the world while outstanding sales to China were 3.9 million tons and 8.5 million to the rest of the world. U.S. soybean export commitments (outstanding sales plus accumulated exports) to China soared to 22.1 million tons compared to 4.8 million the previous year. Total commitments to the world also climbed sharply to 40.7 million tons compared to 16.4 million last year.

2020/21 OUTLOOK CHANGES

Note: All figures are in thousand metric tons.

Country	Commodity	Attribute	Current	Previous	Change	Reason
United States	Oilseed, Soybean	Exports	59,874	57,833	2,041	Record early season sales
